

TOLLING — THAILAND

More than 200 tolled lanes have been delivered to Expressway Authorities of Thailand (EXAT), a governmental institution responsible for all expressways in the Bangkok metropolitan area. Delivery of the tolling solution for EXAT was completed in 2010 and the lanes are situated on Bangkok's outer ring road. They handle more than 2 million transactions each day. In 2016, a major upgrade was

undertaken, using new software and readers from Q-Free, which increased the vehicle speed at which the 5.8GHz DSRC-based system can read OBUs from 10kph to 50kph. This had the effect of increasing capacity by 40 percent while improving the user experience for customers of the Expressway.
