

CENTRAL FLORIDA EXPRESSWAY INTRADA® INSIGHT- FLORIDA, USA

The Central Florida Expressway Authority (CFX), is a limited-access expressway system that serves the greater Orlando metropolitan region with more than 2.3 million residents and an estimated 60 million annual visitors. The CFX system includes 109 centerline miles, 741 lane miles (including ramps), 59 interchanges, 285 bridges and 14 mainline toll plazas. On average, more than 1 million toll transactions are recorded every day, and more than 80% occur electronically.

In 2017, as subcontractor to TransCore, Q-Free delivered Intrada Insight, a high-performance end-to-end image processing solution for video-based toll transactions. In addition, Q-Free was awarded with a seven year IT support and software maintenance service agreement to support ongoing operations.

To achieve optimal system performance, Intrada Insight employs advanced image-based transaction processing technology, as well as carefully considered data transport and encoding protocols to achieve 99.95% accuracy.

Insight uses a tiered approach rather than the single review process that is typically found in other image review solutions throughout North America. The result is expected to provide the agency with significant savings in operational expense (OPEX).
