

## REFERENCE

# MASSDOT INTRADA<sup>®</sup> INSIGHT - MASSACHUSETTS, USA

Successfully launched in October 2016, the Intrada Insight system was deployed as an integral solution to the Massachusetts Department of Transportation (MassDOT) All Electronic Toll System (AETS) program. As part of the Raytheon delivery team, Q-Free deployed the Insight solution statewide across 16 toll zones servicing 32 toll gantries, 122 equipped traffic lanes and approximately 250,000 image based transactions per day. The contract provides for 10 years of operations and maintenance.

Work on this project commenced in February 2015, and is the first collaboration between the Q-Free Netherlands and the Q-Free Chesapeake teams. This project is the first statewide AET system in the northeastern United States, which is the most toll dense region of the country. This endeavor solidifies Q-Free's partnership with Raytheon- a large system integrator with strong presence in the US electronic toll collection industry.
